

**SAVES  
TIME and  
MONEY!**  
at EVERY POOL!

**Eliminates and Prevents Algae • Reduces Chlorine Demand • Lasts up to 6 months!**

PoolRx eliminates existing algae fast and prevents algae from coming back. The chelated minerals free up low levels of chlorine to be more productive in the water, providing amazing clarity. The minerals dissolve out the unit completely and immediately to form a stable residual throughout the entire body of water. As the minerals pass over the PoolRx unit during circulation, they are rejuvenated to last longer. PoolRx is ideal to use with Chlorine, Salt, UV or Ozone systems. Supporting any size body of water, PoolRx is perfect for both Residential and Commercial use.

**Sizing:**

1. Choose the correct PoolRx Unit/s (and additional Boosters if needed) based on total gallons.

| Total Gallons | #101001 Blue Unit 7.5-20k   | #101066 Black Unit 20-30k   | #102001 8oz of Booster 7.5-20k  | Total Gallons | #101001 Blue Unit 7.5-20k   | #101066 Black Unit 20-30k   | #102001 8oz of Booster 7.5-20k  | #102003 10 lb bucket each 2.5 lb bag equal 75k gal.                                 | #101080 Commercial Unit only (No minerals)  |
|---------------|---|---|---|---------------|---|---|---|---|---|
|               |  |  |  |               |  |  |  |  |  |
| 7,500         | 1   |   |   | 70,000        |   | 2   | 1   |   |   |
| 10,000        | 1   |   |   | 80,000        |   | 2   | 1   |   |   |
| 15,000        | 1   |   |   | 90,000        |   | 3   |   |   |   |
| 20,000        | 1   |   |   | 100,000       |   | 3   | 1   |   |   |
| 25,000        |   | 1   |   | 120,000       |   | 3   | 3   |   |   |
| 30,000        |   | 1   |   | 140,000       |   | 3   | 5   |   |   |
| 40,000        |   | 1   | 1   | 150,000       |   |   |   | 2   | 1   |
| 50,000        |   | 1   | 1   | 225,000       |   |   |   | 3   | 1   |
| 60,000        |   | 2   |   | 300,000       |   |   |   | 4   | 1   |

**Installation:**

1. Start with a clean filter.
2. Simply drop the correct size PoolRx Unit/s into the skimmer basket or pump basket.
3. Be sure pump has at least 3 to 4 hours of run time after install, so minerals can dissolve completely.
  - Commercial:** Place unit/s in pump basket/s, pour additional minerals if needed into skimmers.
4. Residential: Do not backwash/clean filter for at least 2 weeks to allow minerals to pass through.
  - Commercial:** Skip one backwash cycle if possible. Backwash based on pressure, not by habit.
5. Leave PoolRx Unit/s in basket for entire year, so minerals can be rejuvenated during circulation.

Place in skimmer

or place in pump basket

Pour in booster minerals if needed

## Maintenance

- For best results maintain normal pool chemistry, with a lower chlorine residual.  
**Residential:** Free Chlorine minimum ppm (0.5-1.0) - **Commercial:** Free Chlorine minimum ppm (1.0-5.0).  
*If you'd like to keep a higher chlorine ppm, you can, with PoolRx it will take you LESS chlorine to reach it.*
- PoolRx Unit must be replaced at the beginning of every swimming season for best results. The Unit loses its effectiveness in rejuvenating the minerals after 12 months in the water.
- Booster Minerals should be added after 4 to 6 months based on bather load and conditions. Simply pour the contents of the Booster into the skimmer or pump basket. You do not need to add minerals back inside of unit. Leave empty PoolRx Unit inside skimmer or pump basket so Booster minerals can be rejuvenated during circulation.

## How are Minerals lost?

PoolRx Minerals are lost through algae kill, splash out, backwashing and filter cleaning.

- The more these factors happen, the more extreme the conditions, the shorter the lifespan.

## How do I know when to add more minerals?

PoolRx uses proprietary chelating agents that protect the minerals from falling out of solution. Because of this, the PoolRx minerals cannot be tested for in the water by your typical reagent test equipment.

| Item Number | Item Description  | Units/Case |
|-------------|---|------------|
| 101001      | <b>Blue</b> unit, 7.5k-20k gallons  | 12         |
| 101003      | 4pack - <b>Blue</b> units, 7.5-20k gallons  | 6 (4packs) |
| 101066      | <b>Black</b> unit; 20k-30k gallons  | 12         |
| 101067      | 4pack - <b>Black</b> units; 20k-30k gallons   | 6 (4packs) |
| 102001      | <b>Booster</b> Mineral; 7.5k-20k gallons  | 18         |
| 102004      | 4pack - <b>Booster</b> Mineral; 7.5k-20k gallons  | 6 (4packs) |
| 102003      | <b>Booster Mineral Bucket;</b> includes 4x 2.5 lb. bags / supports up to 300K gallons   | 1          |
| 101080      | <b>Commercial</b> unit only; no mineral (needs pn; 102003) rejuvenates 75k-500k gallons | 1          |
| 101057      | <b>Yellow</b> Spa unit; 100-400 gallons   | 18         |
| 101055      | <b>Black</b> Spa unit: 400-1000 gallons   | 18         |
| 101058      | <b>Sundance</b> Spa unit: 400-1000 gallons  | 18         |

### You will know you need more minerals based on these factors:

- Time: It's been 4-6 months since you first installed PoolRx
- Your chlorine demand goes back up to where it was prior to installing PoolRx
- Your water is cloudy or you start to see algae

**Note: Because a small amount of minerals are still working in the water you will notice a gradual change over about a two week period. This gives you plenty of time to add a Booster.**
